

Version 1.58

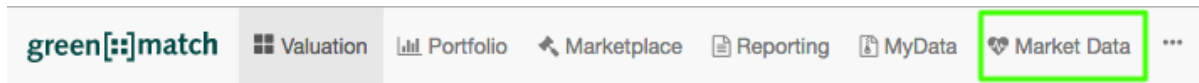

New Features

- New **"MyData"** tab: Save your templates centrally in your personal "MyData" tab and reuse a copy of them in all desired projects. Currently you can save "Price Templates", "Indexations" and "Base Rates" in your "MyData" tab.
Note: We will continuously enhance the available objects for the "MyData" tab.

[Learn more in our Knowledge Center >>](#)

- New **"Market Data"** tab: In this new tab you can request templates for feed-in tariff systems, country specific electricity price forecasts, maintenance contracts, inflation forecasts and many more useful market informations.

I want to access:

[Something else...](#)

- **Fimo Excel Export:** You can now download the whole financial model as formatted Excel file.

Bug Fixes

- In the "Investors" section an error occurred when the exit date of an investor was before the transaction date of the project itself. If this combination occurs now, there will not be shown an exit value nor a return in the "Investors" section. You will have to change the transaction date in order to get these figures.

Release Date

20th July 2017
